

OKAFOR MICHEAL UGOCHUKWU

JUNIOR FULL-STACK DEVELOPER | REACT | NEXT.JS | NODE.JS | PYTHON

Lagos, Nigeria | 07071341196 | workspeaces166@gmail.com

GitHub: michealugo166-cmyk | LinkedIn: linkedin.com/in/okafor-paul-a51551434

PROFESSIONAL SUMMARY

Junior software developer and Advanced Diploma in Software Engineering (ADSE) student with hands-on experience building web applications, backend services, AI-assisted tools and database-driven projects. Experienced with JavaScript, React, Next.js, Node.js, Python, HTML, CSS and SQL/MySQL, with practical experience working with APIs, authentication, project architecture, debugging and Git-based development. Experienced in collaborative development, including working with another developer on a shared GitHub codebase. Strong interest in full-stack development, artificial intelligence, automation and practical software solutions.

CORE TECHNICAL SKILLS

Frontend	HTML, CSS, JavaScript, React, Next.js, responsive UI, Vite
Backend	Node.js, REST APIs, server-side development, authentication, API integration
Programming	JavaScript, Python, Java, C, C#, Dart
Databases	SQL, MySQL, Firebase
AI & Automation	Python AI applications, API-powered assistants, data analysis, automation
Tools & Practices	Git, GitHub, VS Code, npm, MySQL Workbench, collaborative development, debugging

SELECTED PROJECTS

Receipta — Invoicing & Receipts SaaS

Next.js | React | TypeScript | Firebase | Paystack | Node.js | Git | GitHub

- Co-developed Receipta as a two-developer project, collaborating throughout development on a shared codebase.
- Used Git and GitHub for collaborative source control, regularly pushing and pulling code and integrating changes from both developers.
- Worked on authentication, onboarding, invoicing, receipts, PDF documents, inventory and payment-related functionality.
- Worked with Next.js architecture, TypeScript, React components and API routes.
- Integrated Firebase services for application data and authentication workflows and worked with Paystack-related payment functionality.
- Debugged development issues while coordinating changes with the other developer and analysed a large project structure.

NOVA 2.0 — Personal AI Assistant

Python | Groq API | AI | Automation

- Designed and developed NOVA as a personal AI assistant for programming, research, learning and productivity tasks.
- Implemented a Python-based agent architecture communicating with an AI model through an API.
- Developed a project-inspection capability that analyses project folders and identifies technologies used within a project.
- Built scanning functionality that handles large project structures while excluding unnecessary directories such as node_modules, .git, build outputs and caches.
- Added technology recognition, project structure reporting, important-file detection, file statistics and detected technology summaries.

Sports Prediction AI

Python | Data Analysis | Machine Learning | CSV Data

- Developed a sports prediction project using football match datasets and multiple Premier League CSV datasets.
- Worked with data processing and prediction approaches for match outcomes and goal-related predictions.
- Experimented with model evaluation and prediction accuracy as part of the development process.

Portfolio, To-Do List & Weather Applications

React | JavaScript | HTML | CSS | APIs

- Built multiple practical applications to strengthen frontend development, component-based React, state management and API integration skills.
- Implemented interactive task management features, themes, editing/deletion, animations and dynamic weather data.

DEVELOPMENT EXPERIENCE

Independent & Academic Software Development

- Built multiple software projects while developing practical skills through hands-on programming and application development.
- Worked across frontend, backend, databases and APIs rather than focusing on a single development layer.
- Debugged issues involving npm, Vite, package configuration, Python dependencies, database setup and application structure.
- Used Git and GitHub for source control and collaborative development.

EDUCATION

Aptech College

Advanced Diploma in Software Engineering (ADSE) | 2024 – Present

Currently developing practical software engineering skills through programming, application development, databases and software projects.

AREAS OF INTEREST

Full-Stack Web Development • Artificial Intelligence & AI Agents • Backend Development • Software Engineering • Automation • APIs & Integrations • Database Development • Developer Tools
