

OKAFOR MICHEAL UGOCHUKWU

JUNIOR FULL-STACK DEVELOPER | REACT | NEXT.JS | NODE.JS | PYTHON

Lagos, Nigeria | 07071341196 | workspeaces166@gmail.com | GitHub | LinkedIn

PORTFOLIO: micheal-portfolio-six.vercel.app

PROFESSIONAL SUMMARY

Junior Full-Stack Developer with hands-on experience building web applications, backend functionality, AI-powered tools and database-driven projects. Skilled in JavaScript, React, Next.js, TypeScript, Node.js, Python, HTML, CSS, SQL/MySQL and Firebase. Experienced with API integration, authentication, debugging, Git/GitHub and collaborative software development. Co-developed a SaaS application with another developer using a shared GitHub workflow. Currently pursuing an ADSE and seeking a remote junior developer or software development internship.

CORE TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript, React, Next.js, TypeScript, Vite, Responsive Design	Backend	Node.js, REST APIs, Next.js API Routes, Authentication, API Integration
Programming	JavaScript, TypeScript, Python, Java, C, C#, Dart	Databases	SQL, MySQL, Firebase
AI & Automation	Python AI Applications, AI APIs, Automation, Data Analysis, Developer Tools	Tools	Git, GitHub, VS Code, npm, MySQL Workbench, Debugging

SELECTED PROJECTS

RECEIPTA — INVOICING & RECEIPTS SaaS

Next.js | React | TypeScript | Firebase | Paystack | Node.js | Git | GitHub

- Co-developed a SaaS application with another developer using a shared GitHub codebase and collaborative workflow.
- Used Git/GitHub to push, pull, integrate and manage code changes throughout development.
- Worked with Next.js, React, TypeScript and API routes across the application.
- Contributed to authentication, onboarding, invoicing, receipts, PDF documents, inventory and payment-related functionality.
- Worked with Firebase and Paystack-related payment functionality; debugged application issues and analysed a large project structure.

NOVA 2.0 — PERSONAL AI ASSISTANT

Python | Groq API | AI | Automation

- Designed a Python-based AI assistant for programming, research, learning and productivity tasks.
- Implemented an AI agent architecture communicating with an AI model through an API.
- Built a project-inspection system that analyses folders and identifies technologies used in projects.
- Added technology detection, important-file detection, file statistics and project technology summaries while excluding unnecessary directories.

SPORTS PREDICTION AI

Python | Data Analysis | Machine Learning | CSV Data

- Developed a Python project using football match datasets and multiple Premier League CSV datasets.
- Worked with data processing and prediction approaches for match outcomes and goal-related predictions.
- Experimented with model evaluation and prediction accuracy.

PORTFOLIO, TO-DO LIST & WEATHER APPLICATIONS

React | JavaScript | HTML | CSS | APIs

- Built practical applications to strengthen React, component-based development, JavaScript logic and API integration.
- Implemented task-management features including editing, deletion, themes and dynamic UI behaviour, plus dynamic weather data.

DEVELOPMENT EXPERIENCE

Independent & Academic Software Development

- Built projects across frontend, backend, APIs, databases and AI-assisted development using JavaScript, React, Next.js, TypeScript, Node.js and Python.
- Used Git and GitHub for source control and collaborative development; debugged issues involving npm, Vite, Python dependencies, databases and application structure.

EDUCATION

APTECH COLLEGE — Advanced Diploma in Software Engineering (ADSE) | 2024 – Present

Developing practical software engineering skills through programming, web applications, databases, APIs and software projects.

AREAS OF INTEREST

Full-Stack Web Development • Frontend Development • Backend Development • Artificial Intelligence • AI Agents • APIs & Integrations • Automation • Database Development • Software Engineering • Developer Tools
